PETITION FOR RULE CHANGE

NOV 26 2 12

Petitioner)
Dale E. Reich)
141 North Center St.) RM Docket Number _____
Seville, Ohio 44273)

Changes Requested in Retail Point of Sales of All over the counter 2 way voice or data equipment.

This request shall not apply the the current and future wireless provider that provides service that interconnects the public telephone or public network. Exempt are common Cell Telephones, PCS Telephones. SMR type of Telephones & SMR Radio/ Telephones, any any future wireless device that that the Chief of the WTB wishes to Exempt by Public Notice.

The FCC would require all over the counter sales of any communications equipment to keep in writing informatia as to the Name, Address, Phone Number, and any future information when selling a radio that required licensing under the current FCC rules.

The Chief of the WTB without need of approval of the Commission could draft any urgent change in this requirement, and with only Public Notice state a effective date for new changes in this record keeping file

The information collected by the retail vendor is Private, No Public Inspection would be permitted , unless wave by the retail customer. The Commission or its authorized agents, and any Law Enforcement officials may make a reasonable request to inspect, or have copies for needed official use only.

Any Retail Vendor may request the local police to look into if he has a suspicious overview that the use of the radios may not be compliance with Federal or Local Law's

The FCC will supply a format for the need information along with the Public Notice as the required data. The format should be easy for downloading & local printing of the the information form.

The Commission should also Make this form a requirement for Unlicensed Operations in all FCC parts as well. The Record retention by the vendor shall be no less than 3 years. The customer must sign the Sales Slip, or Vendor Printed Form.

If the party has a Radio license, or is a long established customer, with a known address in the vendors data base, and its not being shipped to another address the form requirement could be waved as long as the vendor can trace the shipment, delivery, or arrival to the long term customer. In that case the Records must be retaine (3) years minimum.

.Respectfully Submitted,

Dale E. Reich

Seville, Ohio 44273)

RM Docket Number _____

Changes Requested in Mobile & Portable Ownership & License Tagging for:

Part's 5 - 15 - 18 - 74 - 80 - 90 - 95 - 97:

The "Ownership Tagging" would also be extended to all devices in part 95 that are common over the counter sales as communications voice or data. This would extend to Citizen Band, Family Radio, Multi-Use Radio, and General Mobile Radio Service, and other future FCC areas the commission seeks to require. Any Assigned FCC File Number or Assigned FCC Call Sign must be also listed.

Part's 5, 15, 18, 74, 80, 87, 90, 95 and 97 would require mobile transmitters used off the licensee home site area must be tagged with the Assigned Call Sign - Owner Name -Address. This required tagging could be inside the normal battery compartment access door. Mobile Radios must be Tagged at the control point, and at the transmitter point.

Clear Manufacture Tagging of all over the counter licensed or unlicensed transmitter products would require the requirements for a Ownership tagging in future voice or data communications covered by the various FCC sub parts.

The FCC use to require licensed transmitters to be tagged in the past and the object is to give the **law enforcement** in the field a tool when having chats with fellows in the field to the effect "Hey-Bud you got a License" for that radio" The original equipment manufactures tag would give the local law enforcement a general guide. The ownership tagging with the minimum information would also be a aid to inquires by local law.

Clearly if the manufactured equipment is for Licensed Use Only the Tag must also state proof of license required.

The FCC removed the use of the old FCC-form 452-C in the era of de-regulation of federal rules. It is long time over due for the needed tool's of Local Law Enforcement. The required ownership tagging of Part 15 voice and data communications used in the field must also be considered that involve Transmitters.

Respectfully Submitted,

Dale E. Reich
